## Fund Description

This Fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in large companies across the growth spectrum. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

## Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, while monitoring risk in the portfolio. Analysts identify securities that they believe may provide strong, long-term, organic growth opportunities, or that are uniquely positioned within the industry. Each analyst uses a proprietary research process, considering the factors and characteristics that are most relevant for each industry. The analyst team's "best ideas" in each sector are presented to the portfolio management team as candidates for the portfolio. The Fund's portfolio managers are responsible for portfolio construction and risk management.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

\*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

Prior to Feb. 29, 2016, the maximum sales charge for the fund was 5.50%; however, the prior rate is not reflected for periods that began prior to that date.

\*\*The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower. ©2024 Morningstar, Inc. All rights reserved. **Risks:** Large companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The Fund's value is influenced by a number of factors, including the performance of the broader market and risks specific to the Fund's asset classes, investment styles, and issuers. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. A non-diversified portfolio is generally more susceptible to the risk that events or developments affecting a particular issuer or industry will significantly affect performance results. Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market. These and other risks are described in the prospectus.
