## Fund Description

This Fund seeks to provide a high level of income by investing in a diversified mix of fixed income securities along with other opportunistic investments. The Fund invests primarily in higher-yielding, higher-risk fixed income securities in an attempt to generate income. The Fund is tactically managed, which means the asset mix will change depending on the market environment. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

## Investment Strategy/Process

The Fund has a long-term target allocation of 5% core fixed income, 40% high-income, and 55% flexible income. The target allocation is subject to change. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sectors based on their views of the market and economy. Securities are analyzed and selected on an ongoing basis. Core fixed income securities include Treasury securities and cash. High-Income fixed income securities include high yield and emerging market debt. Flexible income investments may include preferred stocks, closed-end funds, ETFs, and convertible bonds.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in fees and expenses.

\*\*The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

\*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

## Investment Objective

Thrivent Multidimensional Income Fund seeks a high level of current income and, secondarily, growth of capital.

## Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

## Benchmark(s)

**Risks:** Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. High yield securities are subject to increased credit risk as well as liquidity risk. Closed-end funds, ETFs, preferred securities, convertible securities, sovereign debt, and mortgage-related and other asset-backed securities are subject to additional risks. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) also involves risks. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. U.S. government securities may not be fully guaranteed by the U.S. government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund's value is influenced by the performance of the broader market and by factors specific to an issuer within the Fund. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. These and other risks are described in the prospectus.

Pending shareholder approval, Thrivent Multidimensional Income Fund will merge into Thrivent Opportunity Income Plus Fund on July 19, 2024. It will be closed to new shareholder accounts at the close of business May 3, 2024. See prospectus for more information.
