

Thrivent Low Volatility Equity Fund

Inception Date Feb. 28, 2017 **Ticker** TLVOX **Total Fund Assets** \$25.06 million **Expense Ratio** Gross: 1.42% Net: 0.95%*

Fund Description

This Fund seeks to provide investors with returns similar to the global equity markets with lower volatility over a full market cycle. The Fund is globally diversified with an approximate allocation range of 50-75% U.S. and 25-50% non-U.S. stocks and may invest in securities of any market capitalization. The Fund employs investment management techniques to identify securities that exhibit low volatility returns. Therefore, it is expected that the Fund will generally underperform the global equity markets during periods of strong market performance.

Investment Strategy/Process

The portfolio management team uses active quantitative management techniques to forecast investment returns and to identify relationships between securities. The process uses factor models and also strives to identify groups of stocks that are less correlated to each other. The team constructs a risk-optimized portfolio with a focus on low-volatility securities. The portfolio is expected to be well-diversified with global securities. As a part of the risk management process, sector, country, and individual security weights will be constrained.

Growth of \$10,000 and Calendar Year Performance (%)

- Calendar Year Total Returns (CYTR) - without charges, fees, or expenses
- Total Market Value (reflects reinvestment of all dividends and capital gains) - \$16,279
- Current Value of Reinvested Dividends and Capital Gains - \$3,109

Average Annualized Returns (%)

Periods less than one year are not annualized

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in fees and expenses.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower. ©2024 Morningstar, Inc. All rights reserved. Risks: The Fund may experience volatility due to investments in equity securities. The Fund's value is influenced by a number of factors, including the performance of the broader market, and risks specific to the Fund's asset classes, investment styles, and issuers. The use of quantitative investing techniques and derivatives such as futures also involves risks. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. These and other risks are described in the prospectus.

Pending shareholder approval, Thrivent Low Volatility Equity Fund will merge into Thrivent Global Stock Fund on July 19, 2024. It will be closed to new shareholder accounts at the close of business May 3, 2024. See prospectus for more information.

Fund Statistics

Statistics shown below are compared to S&P 500[®] Index (represents average performance of 500 large-cap stocks). It is intended to provide a broad comparison to U.S. large-cap stock market, and may not be representative of the Fund's investment strategies and holdings.

Holdings Information

Number of Holdings	154
Turnover Ratio (last 12-months) [†]	86%

Risk/Volatility Measures

Beta (3-year vs. S&P 500[®] Index): A measure of the volatility, or market risk, of an investment compared to the broad U.S. large-cap stock market.

Standard Deviation: Measures risk by showing how much a fund fluctuates relative to its average return over a period of time.

	Fund	S&P 500 [®] Index ^{§§}
3 Year	12.97	17.60
5 Year	13.45	18.37
10 Year	N/A	15.16

Equity Characteristics

Market Capitalization is a measure of the size of the companies held in the portfolio, calculated by multiplying a company's total outstanding shares by the stock price.

	Fund	S&P 500 ^{®§§}
Median Mkt Cap	\$43.86 B	\$35.42 B
Weighted Avg Mkt Cap	\$149.61 B	\$803.92 B

Price to Earnings (P/E) Ratio: A valuation ratio of a company's current share price compared to its earnings per-share, calculated by dividing the market value per share by its trailing 12-month earnings.

	Fund	S&P 500 ^{®§§}
P/E Ratio	19.96	26.13

Return on Equity (ROE): A measure of corporate profitability that shows how much net income the companies in the portfolio have generated as a percentage of shareholder equity.

	Fund	S&P 500 ^{®§§}
ROE	17.99%	28.54%

[†]Turnover Ratio: 12-month rolling as of Feb 29 2024. A measure of a Fund's trading activity calculated by dividing the lesser of long-term purchases/sales by average long-term market value.
