

Thrivent Core Plus Bond ETF

Inception Date	Ticker	Total Fund Assets	Expense Ratio	
Feb. 19, 2025	TCPB	\$249.01 million	Gross: 0.39%	Net: 0.39%

Fund Description

This Fund invests primarily in intermediate maturities of investment-grade government and corporate bonds, but also will invest in securitized debt, emerging market debt, and lower quality bonds like high yield. The Fund may opportunistically invest in foreign issuers (including emerging market issuers), and mortgage-backed securities of any kind. The Fund may use derivatives in order to manage the Fund's duration, or interest rate risk. The ETF is newly formed and does not have any operating history.

Investment Strategy/Process

The portfolio management team seeks to add value by actively managing sector exposure and security selection, and by monitoring risk in an effort to build a well-diversified portfolio. The team uses fundamental and other investment research techniques to determine which debt securities to buy and sell. The Adviser generally focuses on issuers that it believes are financially sound and that have strong cash flows and earnings. The Fund may use an interest-rate management technique that includes the purchase and sale of U.S. Treasury securities and related futures contracts for the purpose of managing the duration of the Fund.

Average Annualized Returns (%)

Periods less than one year are not annualized

	3 Mo	YTD	1 Year	3 Year	5 Year	10 Year	Since Incep

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. A fund's performance for very short time periods may not be indicative of future performance. Market returns are based on the midpoint of the bid/ask spread at market close (typically, 4 p.m. ET) and do not represent returns an investor would receive if shares were traded at other times. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventETFs.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower. ©2025 Morningstar, Inc. All rights reserved. Investment Objective

Thrivent Core Plus Bond ETF seeks a high level of current income and, secondarily, total return and long-term capital growth.

Who Should Consider Investing?

- The Fund may be suitable for investors who:
- Seek a high level of income while preserving principal
 - Have a medium to long-term investment time horizon and a moderately conservative risk tolerance
 - Are willing to accept lower long-term returns in order to have a low to moderate level of risk and volatility

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg US Aggregate Bond Index measures the performance of U.S. investment grade bonds.

Fund Management & Experience

Kent White, CFA—Industry: 1999, Fund: 2025; Cortney Swensen, CFA—Industry: 2005, Fund: 2025

The ETF is newly formed and does not have any operating history. Debt securities may decline in price when interest rates rise and/or issuers are no longer able or willing pay their debt. Mortgage-backed and asset-backed securities are influenced by the housing market and assets underlying such securities. U.S. government securities may not be fully backed by the U.S. government and issuers may not meet their payment obligations. U.S. government securities' value may be affected by credit ratings. High yield securities are subject to credit risk and liquidity risk. Performance is influenced by several factors, including the performance of the broader market and financial sector and risks associated with foreign markets, derivatives, and specific issuers. These and other risks are described in the prospectus.
