**Inception Date** Jun. 30, 2005   **Ticker** THMAX   **Total Fund Assets** \$3.72 billion   **Expense Ratio** Gross: 1.26%   Net: 1.06%\*

### Fund Description

This Fund, the “mid-point” risk option among Thrivent’s suite of Asset Allocation Funds, is designed for investors with a medium to long-term time horizon and a moderate risk tolerance. The Fund is globally diversified across major equity and fixed income sectors. It’s actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

### Investment Strategy/Process

The Fund has a long-term target allocation of 65% equity securities and 35% fixed income. The Fund’s asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), economic sector, or security type (such as private equity). Fixed income sub-classes may be based on maturity, duration, security type or credit rating. The Fund may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

Prior to Feb. 29, 2016, the maximum sales charge for the fund was 5.50%; however, the prior rate is not reflected for periods that began prior to that date.

\*The Adviser has contractually agreed, for as long as the current fee structure is in place, to waive certain investment advisory fees associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

\*\*The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

### Investment Objective

**Risks:** The Fund’s value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser’s allocation strategy, and risks specific to the Fund’s asset classes, market cap groups, investment styles, security type (such as private equity), and issuers. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser’s assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The use of quantitative investing techniques also involves risks. These and other risks are described in the prospectus.
