Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

- **S&P 500® Growth Index** is a market-capitalization-weighted index developed by Standard and Poor's consisting of those stocks within the S&P 500® Index that exhibit strong growth characteristics.
- **Russell 1000® Growth Index** is an unmanaged Index comprised of those Russell 1000® companies with higher than average price-to-book ratios and higher forecasted growth values. It was a benchmark for the Fund until 2/28/2017. See the prospectus for more information.

Fund Management & Experience

Darren M. Bagwell
Fund Start: 2014
Industry Start: 1991

Risks: The Fund primarily invests in securities of large companies, which may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The value of the Fund is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Fund may incur losses due to incorrect assessments of investments by its investment adviser. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards. Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market.

Fund Description

The Thrivent Large Cap Growth Fund seeks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in large company "growth" stocks. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified portfolio. Thrivent analysts identify securities that they believe may provide strong, long-term, organic growth opportunities, or that are uniquely positioned within the industry. Each analyst uses a proprietary research process, considering the factors and characteristics that are most relevant for each industry. The analyst team's "best ideas" in each sector are presented to the portfolio management team as candidates for the portfolio. The Fund's portfolio managers are responsible for portfolio construction and risk management. Variances in the portfolio's sector weightings compared to the benchmark are minimized in an effort to ensure that stock selection is the primary source of excess return.

All data represents past performance and assumes the reinvestment of dividends and capital gains. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit ThriventFunds.com for performance results current to the most recent month-end.

All performance shown reflects the current maximum sales charge of 4.5%. Prior to Feb. 29, 2016, the maximum sales charge was 5.5%; however, the prior rate is not reflected for periods that began prior to that date.
