Fund Description

The Thrivent Mid Cap Stock Fund seeks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in a combination of "growth" and "value" stocks. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Mid-sized companies may be more established than small companies but have the opportunity to experience faster growth as they seek to become large-cap companies. However, they typically have greater risk than larger, more-seasoned companies.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management. The Fund invests in a diversified portfolio of growth and value stocks with improving or positive outlooks relative to market expectations. The process begins with idea generation and screening to identify stocks that have certain characteristics. The team uses fundamental, quantitative and technical investment research techniques to seek to identify and purchase mid-sized companies that are in industries with good economic outlooks and that have strong prospects for growth in their sales and earnings. They also seek to identify companies with high-quality management teams and strong financial positions, and monitor risk in an effort to build a well-diversified portfolio.

Fund Management & Experience

Brian J. Flanagan, CFA

Fund Start: 2004; Industry Start: 1993

Risks: The Fund primarily invests in securities of mid-sized companies, which often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The value of the Fund is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Fund may incur losses due to incorrect assessments of investments by its investment adviser.
