Risks: The Fund primarily invests in equity and debt securities of issuers throughout the world. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards; these risks are magnified for investments in emerging markets. The value of the Fund is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Fund may incur losses due to incorrect assessments of investments by its investment advisers. Small and medium-sized companies often have greater price volatility and less liquidity than larger companies. Large cap companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. Bond prices generally fall as interest rates rise. Credit risk is the risk that an issuer of a debt security may not pay its debt, and high yield securities are subject to increased credit risk as well as liquidity risk. The investment styles employed by the Fund's sub-advisers may not be complementary.

Fund Description

The Thrivent Partner Worldwide Allocation Fund is a well-diversified portfolio of global securities. It is designed to provide investors with an all-in-one solution for international investing and includes allocations to large, mid and small-cap international companies, across the growth, value, and core investment styles. It also provides exposure to the emerging market equity and emerging market debt markets. The Fund has a long-term target allocation of approximately 30% international large cap growth, 30% international large cap value, 15% international small- and mid-cap companies, 15% emerging market equity and 10% emerging market debt securities. Investors should be comfortable with the high level of volatility that is associated with emerging market investing.

Investment Strategy/Process

The Fund seeks to achieve its objective by investing primarily in a portfolio of broadly-diversified international equity and debt securities. The Fund uses internal management professionals as well as several sub-advisors to manage the various asset classes. Thrivent Asset Management makes asset allocation decisions among the various asset classes and selects and monitors the sub-advisors on an ongoing basis. Each of the portfolio management teams seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio.
