Fund Description

Thrivent Partner Worldwide Allocation Fund is a well-diversified portfolio of global securities that is managed by a variety of different sub-advisors. It is designed to provide investors with an all-in-one solution for international investing and includes allocations to large, mid and small-cap international companies, across the growth, value, and core investment styles. The Fund also provides exposure to the emerging market equity and emerging market debt markets. Investors should be comfortable with the high level of volatility that is associated with emerging market investing.

Investment Strategy/Process

The portfolio management team seeks to achieve its objective by investing primarily in a portfolio of broadly-diversified international equity and debt securities. The Fund has a long-term target allocation of approximately 30% international large-cap growth, 30% international large-cap value, 15% international small- and mid-cap companies, 15% emerging-market equity and 10% emerging-market debt securities. The Fund utilizes a variety of sub-advisors to manage the various asset classes. Thrivent Asset Management makes asset allocation decisions among the various asset classes and selects and monitors the sub-advisors on an ongoing basis. Each of the portfolio management teams seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio.

All data represents past performance and assumes the reinvestment of dividends and capital gains. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Visit ThriventFunds.com or call 800-847-4836 for performance results current to the most recent month-end.

All performance shown reflects the current maximum sales charge of 4.5%. Prior to Feb. 29, 2016, the maximum sales charge was 5.5%; however, the prior rate is not reflected for periods that began prior to that date.

¹Source: Lipper LANA. The Lipper median represents the median annualized total return for all reported funds in the classification. Lipper medians do not include sales charges or fees. If included, returns would have been lower.

Investment Objective

Thrivent Partner Worldwide Allocation Fund seeks long-term capital growth.

Who Should Consider Investing?

The Fund may be suitable for investors who:

- Seek long-term growth and a well-diversified, all-in-one solution for international investing.
- Have a long-term investment time horizon and a moderately aggressive risk tolerance.
- Are able to withstand a moderately high level of risk and volatility in pursuit of moderately high long-term returns.

Minimum Investment

Initial (non-retirement): \$2,000
Initial (IRA or tax-deferred): \$1,000
Subsequent: \$50

Expense Ratio

Gross 1.51%
Net 1.35%

The Adviser has contractually agreed, through at least Feb. 28, 2019, to reimburse certain expenses associated with the Fund. Refer to the expense table in the Fund's prospectus.

Risks: Thrivent Partner Worldwide Allocation Fund primarily invests in equity and debt securities of issuers throughout the world. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards; these risks are magnified for investments in emerging-markets. The value of the Fund is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Fund may incur losses due to investments that do not perform as anticipated by the investment advisers. Small- and medium-sized companies often have greater price volatility and less liquidity than larger companies. Large-cap companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. Bond prices may decline during periods of rising interest rates. Credit risk is the risk that an issuer of a debt security may not pay its debt, and high yield securities are subject to increased credit risk as well as liquidity risk. Sovereign debt securities are issued or guaranteed by foreign governmental entities that may delay or refuse to pay interest or repay principal to investors for a variety of economic and/or political reasons. The investment styles employed by the Fund's sub-advisers may not be complementary.
