Fund Description

This Fund invests primarily in U.S. government bonds, which may include debt instruments issued or guaranteed by the U.S. Government and its agencies or instrumentalities. This includes U.S. Treasuries, Treasury Inflation Protected Securities (TIPS), U.S. government agency debt, and mortgage-backed securities that are issued or guaranteed by the Government National Mortgage Association (GNMA), the Federal National Mortgage Association (FNMA) or the Federal Home Loan Mortgage Corporation (FHLMC). The Fund may hold securities of any maturity. Government bonds have a low correlation to equities and may outperform stocks and corporate bonds when these markets are declining and investors tend to become more risk averse. As a result, an allocation to government bonds may help diversify an investor's overall portfolio. The Fund may also utilize derivatives to manage the Fund's duration or interest rate risk.

Investment Strategy/Process

The portfolio management team uses fundamental and other investment research techniques to determine which debt obligations to buy and sell. The portfolio managers are responsible for portfolio construction and risk management, and use duration and yield curve management strategies in an effort to increase total return potential and manage risk.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Risks: U.S. government securities may not be fully guaranteed by the U.S. government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. Debt securities are subject to risks such as declining prices during periods of rising interest rates. The use of derivatives (such as futures) involves additional risks and transaction costs. Inflation-linked debt securities, such as TIPS, are subject to the effects of changes in market interest rates caused by factors other than inflation (real interest rates). The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund's value is influenced by the performance of the broader market. The Fund may engage in active and frequent trading of portfolio securities, which may result in higher transaction costs and higher taxes. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. Sovereign debt securities are subject to additional risks. These and other risks are described in the prospectus.
