## Fund Description

This fund is managed as a government money market fund according to rules established by the Securities and Exchange Commission (SEC) that are designed so that the Fund may maintain a stable, \$1.00 share price. Those rules generally require the Fund to invest only in high quality securities that are denominated in U.S. dollars and have short remaining maturities. The Fund is also required to maintain a dollar-weighted average maturity of not more than 60 days and a dollar-weighted average life of not more than 120 days.

## Investment Strategy/Process

The portfolio management team seeks to produce current income while maintaining liquidity by investing at least 99.5% of its total assets in U.S. government securities, cash and repurchase agreements collateralized fully by government securities or cash. The Adviser invests in securities by selecting from the available supply of short-term government securities based on its interest rate outlook and analysis of quantitative and technical factors. Although the Fund frequently holds securities until maturity, the Adviser may sell securities to increase liquidity.

**All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit [thriventfunds.com](http://thriventfunds.com) for performance results current to the most recent month-end.**

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

\*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees associated with the Fund. However, this may be terminated before the indicated termination date upon the mutual agreement between the Trustees of the Fund and the Adviser. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

**You could lose money by investing in the Thrivent Money Market Fund. Although the Thrivent Money Market Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Thrivent Money Market Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Thrivent Money Market Fund's sponsor has no legal obligation to provide financial support to the Thrivent Money Market Fund, and you should not expect that the sponsor will provide financial support to the Thrivent Money Market Fund at any time.**

**Risks:** The Fund invests at least 99.5% of its assets in government securities, cash and repurchase agreements collateralized fully by government securities or cash. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so and you could lose money. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund sponsor has no legal obligation to provide financial support to the Fund and you should not expect that the sponsor will provide financial support to the Fund at any time. U.S. Government securities may not be fully guaranteed by the U.S. Government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. If the seller of a repurchase agreement defaults, the Fund may incur losses. These and other risks are described in the prospectus.

<sup>#</sup>**Thrivent Money Market Fund Yield:** 7-Day Current Yield is the yield generated by an investment in the Fund over a 7-day period ended on the date of the calculation and expressed as an annual percentage. 7-Day Effective Yield is calculated similarly to the 7-day current yield, except that the effective yield assumes that income earned from the Fund's investments is reinvested and generating additional income. It is expressed as an annual percentage. The yield quotation more closely reflects the current earnings of the Thrivent Money Market Fund than the total return quotation.

<sup>††</sup>NAV = Net Asset Value. Class A shares of this fund have no sales charge.

<sup>§</sup>Average of the daily NAV values for the trailing 12-months.
