Fund Focus

**Quarterly Performance Update
Class A Share**

How To Use This Booklet

You'll find a wealth of information about Thrivent Mutual Funds in this booklet, including each Fund's:

- Performance over the period.
- Investment objectives and risks.
- Portfolio management team, their processes and their strategies.

To provide context and a performance comparison, we also include the performance of the Fund's benchmark(s) and Morningstar peer group (when applicable).

All data represents past performance and does not guarantee future results.

People

Our team has more than 140 investment professionals who bring their deep expertise to managing Thrivent funds so you can feel confident in the choices you make. Of these individuals:

- More than 80% have at least 10 years of experience.
- Over 50% have more than 20 years of investment experience.
- More than 80% have earned the Chartered Financial Analyst designation, an advanced degree, or both.

We manage not only a family of mutual funds, but variable subaccount portfolios, and the general account assets for Thrivent, a Fortune 500 company with \$194 billion in assets under management/advisement¹ (as of Dec. 31, 2024).

Philosophy

Thrivent Asset Management, LLC, together with its parent company, Thrivent—which has been around for over a century—have operated with an emphasis on integrity. To best serve our clients, our team is committed to an investment philosophy that includes these goals:

- Consistent, competitive performance over the long-term. Our portfolio managers aim to achieve long-term investment success by focusing on in-depth, proprietary research in asset allocation, portfolio management and security selection. Our products combine fundamental, technical and quantitative research perspectives with active investment management.
- Style consistency. Our funds strive to remain true to their stated investment objectives to support an overall asset allocation strategy.
- Competitive fees and expenses. We strive to provide value to our clients by keeping net operating expenses at or below the industry average on most of our products.

Process

Our investment professionals use a robust, multi-step process to create a product suite of well-diversified portfolios that meet a range of investment goals and objectives.

- Portfolio management. Our portfolio managers determine which securities to buy and sell in order to construct well-diversified portfolios within their respective asset class categories, such as small-cap stocks or high-yield bonds.
- Strategic asset allocation. We use sophisticated portfolio optimization strategies based on risk and return expectations, mathematical models and statistical analysis to develop our long-term strategic asset allocation targets.
- Tactical investment decisions. We use our knowledge, experience, and the latest market and economic data to form views and make decisions in an effort to stay on top of ever-changing market conditions.
- Company research. Our analysts perform an intensive review of the companies within their sectors by meeting with management, examining financial statements and assessing each company's competitiveness and long-term prospects.
- Risk management. We strive to keep our funds within certain parameters and guidelines so that the risks remain consistent with each fund's investment objective.

¹As of December 31, 2024. Includes the Thrivent General Account (which manages surplus and the assets backing our life insurance, fixed annuity and health products), variable subaccount portfolios (primarily connected to variable annuities and variable universal life insurance), funds (including open-end and exchange traded funds) and other assets related to our affiliates and other subsidiaries.

A Quarterly Review of the Markets

March 31, 2025

Steve Lowe, CFA, Chief Investment Strategist, and his team provide a review and analysis of how the economy influenced markets in the past quarter.

Thrivent Aggressive Allocation Fund

Inception Date

Jun. 30, 2005

Ticker

TAAAX

Total Fund Assets

\$2.68 billion

Expense Ratio

Gross: 1.37%
Net: 1.20%*

Fund Description

This Fund, the most aggressive in Thrivent's suite of Asset Allocation Funds, is designed for investors with a long-term time horizon and higher risk tolerance. The Fund is globally diversified across major equity and fixed income sectors and styles. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

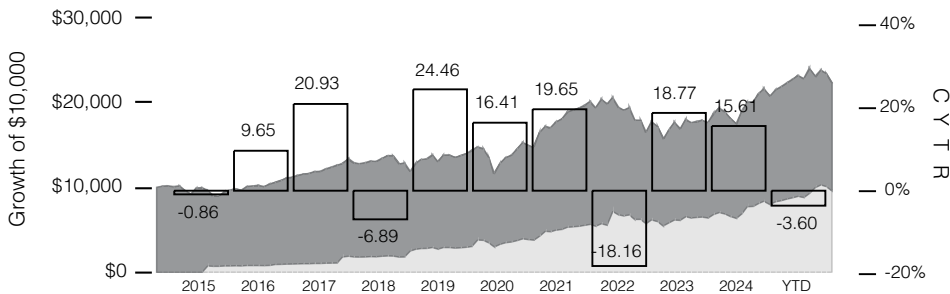

The Fund has a long-term target allocation of 95% equity securities and 5% fixed income. The Fund's asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), economic sector, or security type (such as private equity). Fixed income sub-classes may be based on maturity, duration, security type or credit rating. The Fund may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

Prior to Feb. 29, 2016, the maximum sales charge for the fund was 5.50%; however, the prior rate is not reflected for periods that began prior to that date.

*The Adviser has contractually agreed, for as long as the current fee structure is in place, to waive certain investment advisory fees associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Aggressive Allocation Fund seeks long-term capital growth.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

S&P 500® Index is a market-cap weighted index that represents the average performance of a group of 500 large-capitalization stocks.

MSCI All Country World Index ex-USA - USD Net Returns measures equity market performance in global developed and emerging markets outside of the US.

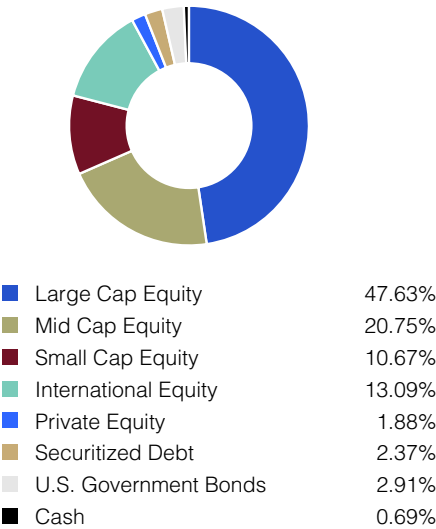

Bloomberg US Aggregate Bond Index measures the performance of U.S. investment grade bonds.

Fund Management & Experience

Stephen Lowe, CFA—Industry: 1996, Fund: 2016; David Royal—Industry: 1997, Fund: 2018; David Spangler, CFA—Industry: 1989, Fund: 2019

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups, investment styles, security type (such as private equity), and issuers. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The use of quantitative investing techniques also involves risks. These and other risks are described in the prospectus.

Thrivent Moderately Aggressive Allocation Fund

Inception Date Jun. 30, 2005 **Ticker** TMAAX **Total Fund Assets** \$4.66 billion **Expense Ratio** Gross: 1.35% Net: 1.12%*

Fund Description

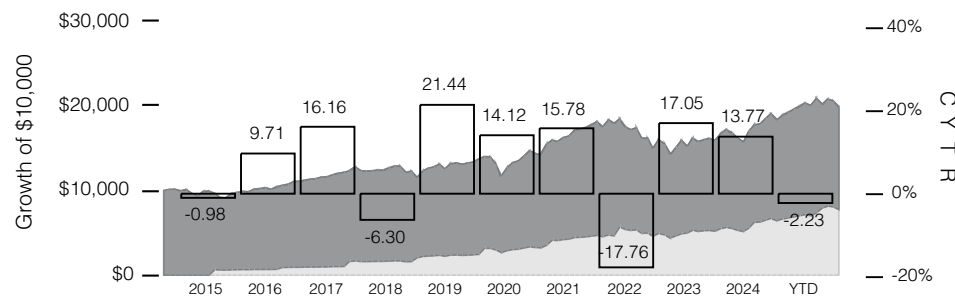

This Fund, the second-most aggressive option in Thrivent's suite of Asset Allocation Funds, is designed for investors with a long-term time horizon and moderately high risk tolerance. The Fund is globally diversified across major equity and fixed income sectors and styles. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Fund has a long-term target allocation of 80% equity securities and 20% fixed income. The Fund's asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), economic sector, or security type (such as private equity). Fixed income sub-classes may be based on maturity, duration, security type, or credit rating. The Fund may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

Thrivent Moderate Allocation Fund

Inception Date Jun. 30, 2005 **Ticker** THMAX **Total Fund Assets** \$3.72 billion **Expense Ratio** Gross: 1.26% Net: 1.06%*

Fund Description

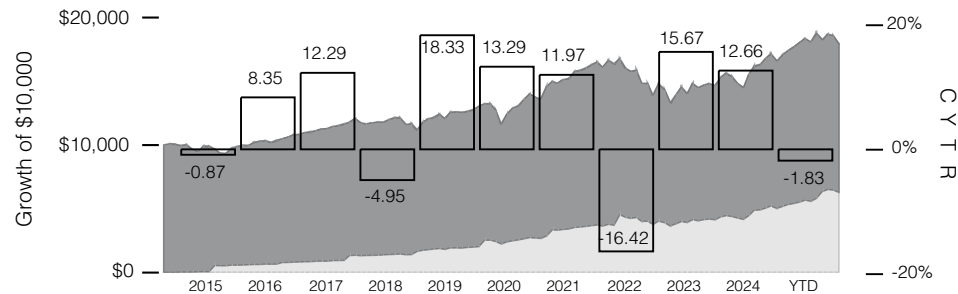

This Fund, the "mid-point" risk option among Thrivent's suite of Asset Allocation Funds, is designed for investors with a medium to long-term time horizon and a moderate risk tolerance. The Fund is globally diversified across major equity and fixed income sectors. It's actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Fund has a long-term target allocation of 65% equity securities and 35% fixed income. The Fund's asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), economic sector, or security type (such as private equity). Fixed income sub-classes may be based on maturity, duration, security type or credit rating. The Fund may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

Thrivent Dynamic Allocation Fund

Inception Date Dec. 29, 1997 **Ticker** AABFX **Total Fund Assets** \$407.05 million **Expense Ratio** Gross: 1.03% Net: 0.99%*

Fund Description

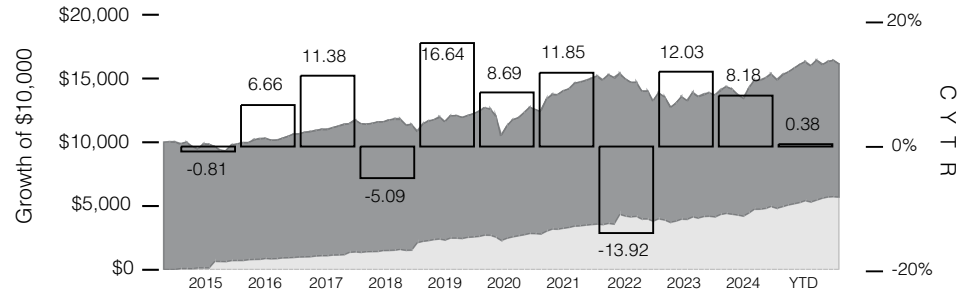

This Fund provides a balanced approach to income and capital appreciation. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments. Approximately half of the portfolio is invested in equity securities to provide potential growth, while the other half of the portfolio is invested in higher-yielding, higher-risk, fixed income securities to generate income. Investments are diversified across sectors in order to manage risk, potentially provide more stability when interest rates rise, and to provide the opportunity for long-term capital growth and income. Prior to 2/28/2025, the Fund was named Thrivent Balanced Income Plus Fund.

Investment Strategy/Process

The Fund has a long-term target allocation of 45% equity securities and 55% fixed income. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sectors based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

Prior to Feb. 29, 2016, the maximum sales charge for the fund was 5.50%; however, the prior rate is not reflected for periods that began prior to that date.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Dynamic Allocation Fund seeks long-term total return through a balance between income and the potential for long-term capital growth.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg Mortgage-Backed Securities Index represents the performance of securities backed by pools of mortgages.

Bloomberg US High Yield Ba/B 2% Issuer Capped Index represents the performance of Ba or B-rated corporate bond market. Issuers are constrained to a maximum 2% weighting.

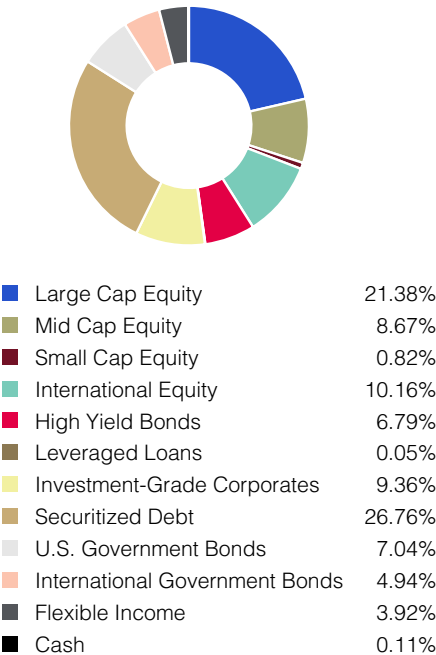

MSCI World Index - USD Net Returns represents large- and mid-cap stocks in 23 developed-market countries.

Fund Management & Experience

Stephen Lowe, CFA—Industry: 1996, Fund: 2013;
David Spangler, CFA—Industry: 1989, Fund: 2019;
Theron Whitehorn, CFA—Industry: 2002, Fund: 2021

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups, investment styles, and issuers. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Sovereign debt and mortgage-related and other asset-backed securities are subject to additional risks. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. When interest rates fall, certain obligations are paid off more quickly and proceeds may have to be invested in securities with lower yields. The use of quantitative investing techniques also involves risk. These and other risks are described in the prospectus.

Thrivent Moderately Conservative Allocation Fund

Inception Date Jun. 30, 2005 **Ticker** TCAAX **Total Fund Assets** \$1.09 billion **Expense Ratio** Gross: 1.20% Net: 1.04%*

Fund Description

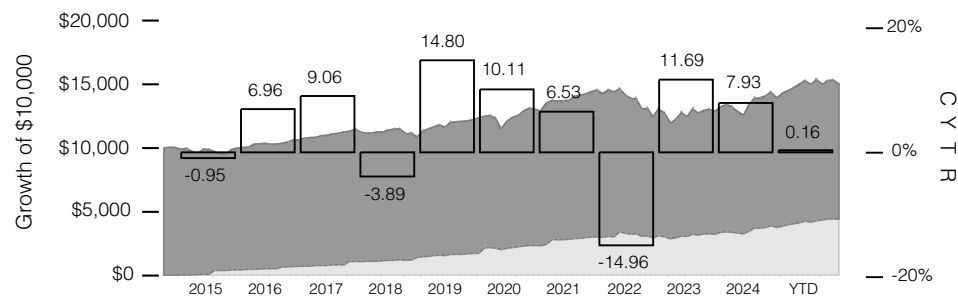

This Fund, the second-most conservative option in Thrivent's suite of Asset Allocation Funds, is designed for investors with a medium to long-term horizon and a moderately conservative risk tolerance. The Fund is globally diversified across major equity and fixed income sectors and styles. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Fund has a long-term target allocation of 43% equity securities and 57% fixed income. The Fund's asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), economic sector, or security type (such as private equity). Fixed income sub-classes may be based on maturity, duration, security type, or credit rating. The Fund may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

Fund Management & Experience

Stephen Lowe, CFA—Industry: 1996, Fund: 2016; David Royal—Industry: 1997, Fund: 2018; David Spangler, CFA—Industry: 1989, Fund: 2019

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups, investment styles, security type (such as private equity), and issuers. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. U.S. government securities may not be fully guaranteed by the U.S. government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The use of quantitative investing techniques and mortgage-related and other asset-backed securities also involve additional risks. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. When interest rates fall, certain obligations are paid off more quickly and proceeds may have to be invested in securities with lower yields. These and other risks are described in the prospectus.

Thrivent Conservative Allocation Fund

Inception Date Jan. 08, 1997
Ticker AAHYX
Total Fund Assets \$964.15 million
Expense Ratio Gross: 0.95%

Fund Description

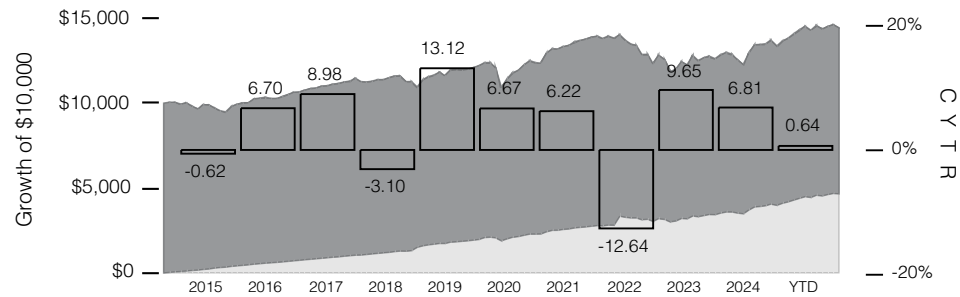

This Fund, the most conservative risk option among Thrivent's suite of Asset Allocation Funds, looks to provide an income stream along with modest capital appreciation. It invests in higher-yielding, higher-risk, fixed income securities to generate income, and in equities to provide potential growth and income. Investments are diversified across sectors in order to manage risk and potentially provide more stability when interest rates fluctuate. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments. Prior to 2/28/2025, the Fund was named Thrivent Diversified Income Plus Fund.

Investment Strategy/Process

The Fund has a long-term target allocation of 80% fixed income and 20% equity securities. The portfolio management team actively manages the Fund with overweight and underweight positions in various sectors based on their views of the market and economy. Individual stocks and bonds are analyzed and chosen on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Conservative Allocation Fund seeks to maximize income while maintaining prospects for capital appreciation.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Stephen Lowe, CFA—Industry: 1996, Fund: 2015;
 Theron Whitehorn, CFA—Industry: 2002, Fund: 2021;
 David Spangler, CFA—Industry: 1989, Fund: 2022

Risks: Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups and issuers. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Preferred securities, sovereign debt, and mortgage-related and other asset-backed securities are subject to additional risks. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. When interest rates fall, certain obligations are paid off more quickly and proceeds may have to be invested in securities with lower yields. The use of quantitative investing techniques also involves risks. These and other risks are described in the prospectus.

Total Fund Assets

\$2.02 billion

Expense Ratio

Gross: 0.96%

Fund Description

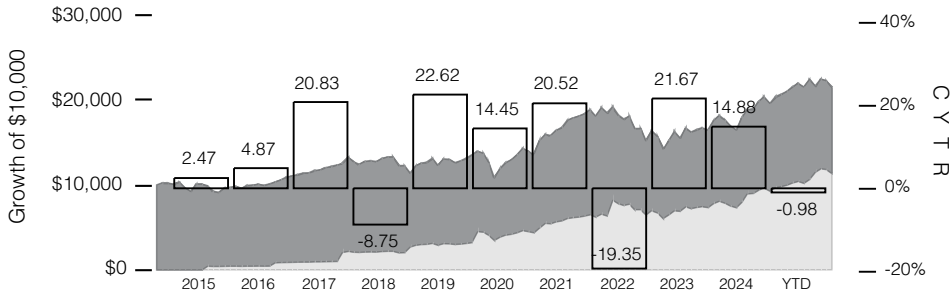

This Fund is a well-diversified portfolio of global securities, which may include companies from all countries including the United States. This Fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in a globally diversified portfolio that includes a combination of companies across the growth and value spectrums. Growth stocks are companies with earnings expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The Fund invests at least 80% of its net assets in equity securities of domestic and international companies and seeks to invest approximately 40% of net assets in foreign securities. However, depending on market conditions, the Fund could invest as low as 30%. The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified, global portfolio. The team uses fundamental, quantitative, and technical investment research techniques to identify and purchase financially-sound companies that appear to have strong, long-term growth prospects and capable management teams.

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups and issuers. Large companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. The use of futures contracts involves additional risks such as a loss in value in the underlying instrument, which could decrease the Fund's value. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The use of quantitative investing techniques also involves risks. These and other risks are described in the prospectus.

Fund Description

This Fund is a well-diversified portfolio of international securities, which includes companies outside of the United States. It's designed to provide investors with an all-in-one solution for international equity investing and includes allocations to large-, mid- and small-cap international companies, across the growth, value, and core investment styles. The Fund also provides exposure to emerging market stocks. Investors should be comfortable with the higher level of volatility that may be associated with international investing. Prior to 2/28/2025, the Fund was named Thrivent International Allocation Fund.

Investment Strategy/Process

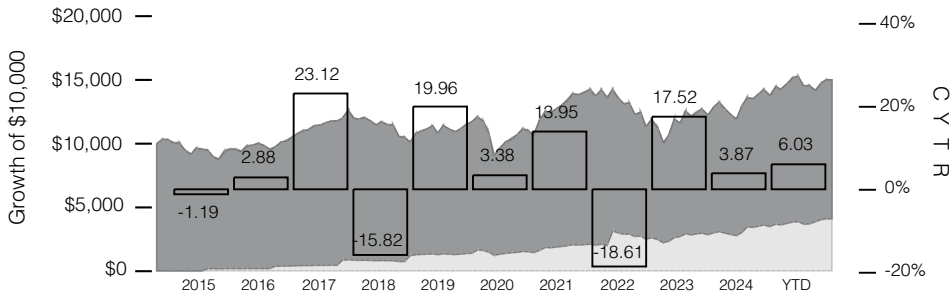

The portfolio management team seeks to achieve its objective by investing primarily in a portfolio of broadly-diversified equity securities of issuers throughout the world. The Fund has a long-term target allocation of approximately 80% international large- and mid-cap companies, 10% emerging market equity securities, 7.5% international small-cap companies and 2.5% cash and other securities. The Investment Adviser makes asset allocation decisions among the various asset classes.

Thrivent Large Cap Growth Fund

Inception Date Oct. 29, 1999
Ticker AAAGX
Total Fund Assets \$3.09 billion
Expense Ratio Gross: 1.01%

Fund Description

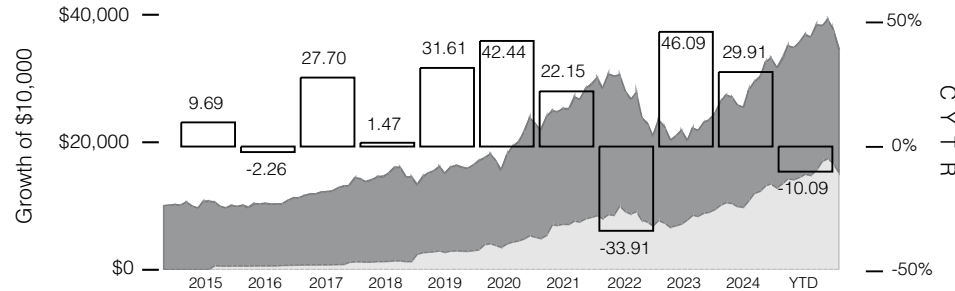

This Fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in large companies across the growth spectrum. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, while monitoring risk in the portfolio. Analysts identify securities that they believe may provide strong, long-term, organic growth opportunities, or that are uniquely positioned within the industry. Each analyst uses a proprietary research process, considering the factors and characteristics that are most relevant for each industry. The analyst team's "best ideas" in each sector are presented to the portfolio management team as candidates for the portfolio. The Fund's portfolio managers are responsible for portfolio construction and risk management.

Fund Management & Experience

Lauri Brunner—Industry: 1993, Fund: 2018; Jaimin Soni—Industry: 2008, Fund: 2022; Nicolas Horns—Industry: 2008, Fund: 2025

Risks: Large companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The Fund's value is influenced by a number of factors, including the performance of the broader market and risks specific to the Fund's asset classes, investment styles, and issuers. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. A non-diversified portfolio is generally more susceptible to the risk that events or developments affecting a particular issuer or industry will significantly affect performance results. Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market. These and other risks are described in the prospectus.

Fund Description

This Fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in large companies across the value spectrum. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

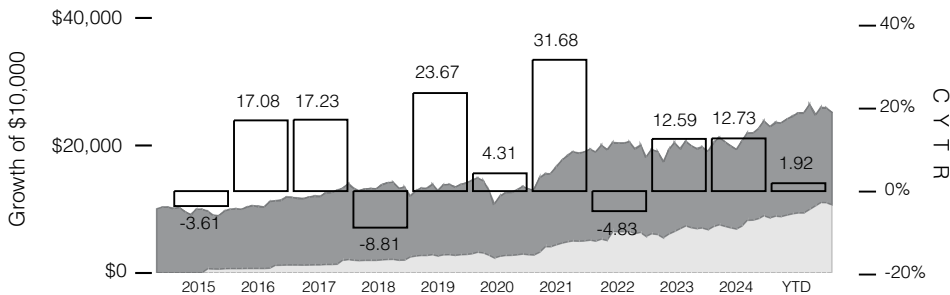

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team also seeks to invest in stocks that they believe are undervalued, which may be because the company is out of favor or has been temporarily overlooked. The team uses fundamental and other investment research techniques in an effort to identify high-quality businesses that are trading at attractive prices, but have good prospects for long-term capital appreciation. Catalysts for improvement may include factors such as improving economic conditions, new industry developments, or a company's plan to improve the business.

Thrivent Mid Cap Stock Fund

Inception Date

Jun. 30, 1993

Ticker

AASCX

Total Fund Assets

\$3.59 billion

Expense Ratio

Gross: 0.96%

Fund Description

This Fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in a combination of mid-sized companies across the growth and value spectrums. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Mid-sized companies may be more established than small companies but have the opportunity to experience faster growth as they seek to become large-cap companies. However, they typically have greater risk than larger, more-seasoned companies.

Investment Strategy/Process

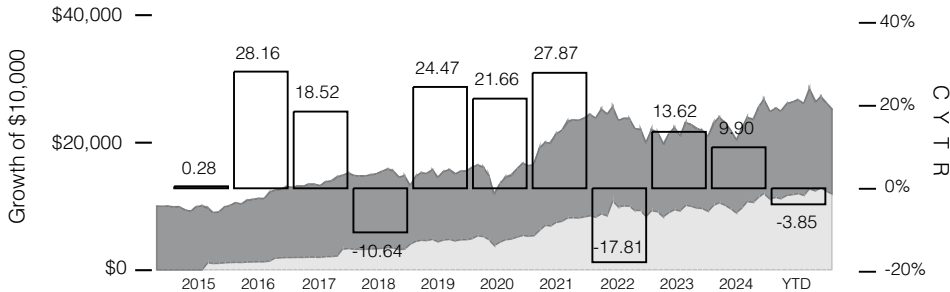

The portfolio management team seeks to add value through stock selection and active management. The Fund invests in a diversified portfolio of growth and value stocks with improving or positive outlooks relative to market expectations. The process begins with idea generation and screening to identify stocks that have certain characteristics. The team uses fundamental and other investment research techniques to seek to identify and purchase mid-sized companies that are in industries with good economic outlooks and that have strong prospects for growth in their sales and earnings. They also seek to identify companies with high-quality management teams and strong financial positions, and monitor risk in an effort to build a well-diversified portfolio.

Total Fund Assets

\$2.93 billion

Expense Ratio

Gross: 1.01%

Fund Description

This Fund looks to provide investors with competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in a combination of small-sized companies across the growth and value spectrums. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Small-sized companies may have the opportunity to grow more rapidly than larger companies as they potentially emerge from a small to a medium-sized company. However, they typically do not pay significant dividends to shareholders and instead reinvest earnings back into the company. Smaller companies have greater volatility (or more risk) because they are often less seasoned, have narrower product lines, less liquidity, smaller revenues and fewer resources than larger companies.

Investment Strategy/Process

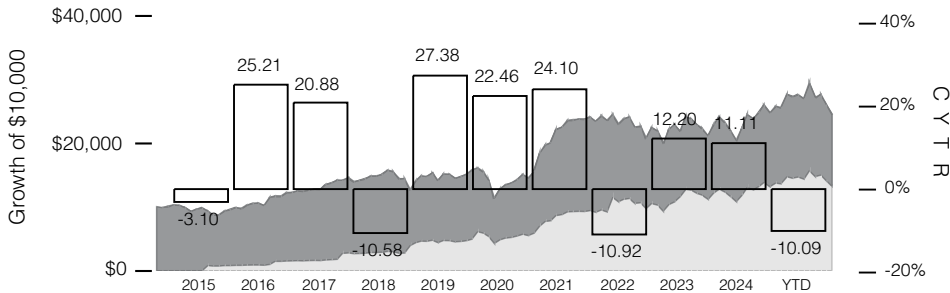

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental and other investment research techniques to identify and purchase small, financially-sound companies that appear to have strong, long-term growth prospects and capable management teams.

Risks: Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The Fund's value is influenced by a number of factors, including the performance of the broader market, and risks specific to the Fund's asset classes and issuers. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. These and other risks are described in the prospectus.

Total Fund Assets

\$41.32 million

Expense Ratio

Gross: 1.49%
Net: 0.80%*

Fund Description

This Fund invests primarily in U.S. government bonds, which may include debt instruments issued or guaranteed by the U.S. Government and its agencies or instrumentalities. This includes U.S. Treasuries, Treasury Inflation Protected Securities (TIPS), U.S. government agency debt, and mortgage-backed securities that are issued or guaranteed by the Government National Mortgage Association (GNMA), the Federal National Mortgage Association (FNMA) or the Federal Home Loan Mortgage Corporation (FHLMC). The Fund may hold securities of any maturity. Government bonds have a low correlation to equities and may outperform stocks and corporate bonds when these markets are declining and investors tend to become more risk averse. As a result, an allocation to government bonds may help diversify an investor's overall portfolio. The Fund may also utilize derivatives to manage the Fund's duration or interest rate risk.

Investment Strategy/Process

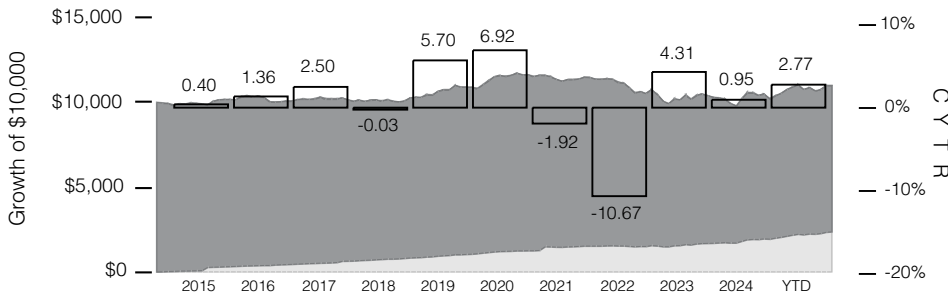

The portfolio management team uses fundamental and other investment research techniques to determine which debt obligations to buy and sell. The portfolio managers are responsible for portfolio construction and risk management, and use duration and yield curve management strategies in an effort to increase total return potential and manage risk.

Class A shares of Thrivent Government Bond Fund are closed to all purchases and exchanges into the Fund, other than the reinvestment of dividends by current shareholders in the Fund.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Government Bond Fund seeks total return, consistent with preservation of capital.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg US Treasury Index measures the performance of the public debt obligations of the U.S. Treasury with remaining maturities of one year or more.

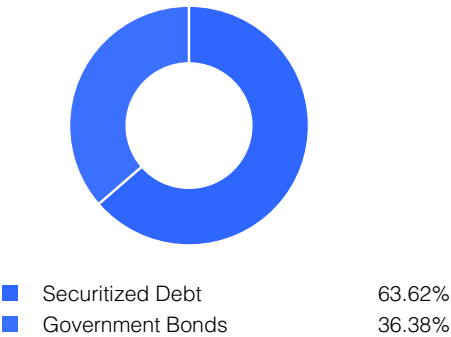

Bloomberg US Agency Index measures the performance of the publicly issued debt of U.S. Government agencies (e.g. Fannie Mae, Freddie Mac) and the Federal Home Loan Bank System.

Fund Management & Experience

Kent White, CFA—Industry: 1999, Fund: 2023; Jon-Paul (JP) Gagne—Industry: 2004, Fund: 2022

Risks: U.S. government securities may not be fully guaranteed by the U.S. government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. Debt securities are subject to risks such as declining prices during periods of rising interest rates. The use of derivatives (such as futures) involves additional risks and transaction costs. Inflation-linked debt securities, such as TIPS, are subject to the effects of changes in market interest rates caused by factors other than inflation (real interest rates). The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund's value is influenced by the performance of the broader market. The Fund may engage in active and frequent trading of portfolio securities, which may result in higher transaction costs and higher taxes. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. Sovereign debt securities are subject to additional risks. These and other risks are described in the prospectus.

Total Fund Assets

\$623.22 million

Expense Ratio

Gross: 0.82%

Fund Description

This Fund invests primarily in corporate bonds that are either unrated or rated as “below investment-grade,” commonly known as “junk bonds.” Credit rating agencies evaluate bond issuers and assign ratings based on their ability to pay interest and repay principal as scheduled. Bond issuers that are considered to have a greater risk of defaulting on payments pay higher interest rates to compensate investors for the additional risk. The Fund is managed as a high yield portfolio that primarily invests in bonds in the top three ratings of the high yield credit quality spectrum. The high yield sector may provide portfolio diversification benefits because it has a low correlation to other sectors of the fixed income market and less sensitivity to interest rate risk, but is more risky than investment-grade debt. The Fund may also utilize derivatives to manage duration, or interest rate risk.

Investment Strategy/Process

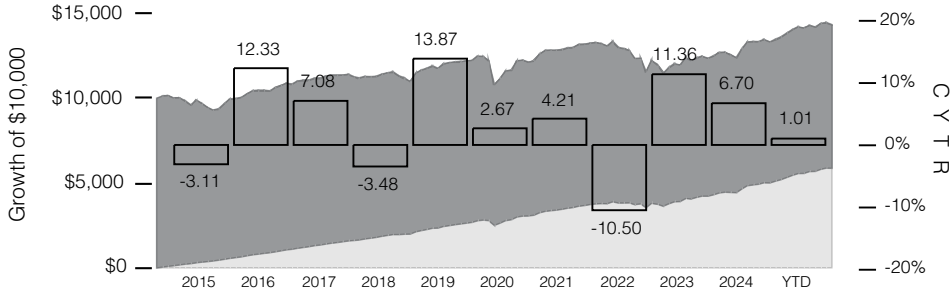

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental and other investment research techniques to determine which securities to buy and sell. Through careful credit research, the team strives to identify U.S. companies that will have adequate cash flows to meet their principal and interest obligations. The team also considers the macro-economic environment and performs an ongoing assessment of relative value and risk. Based on this market outlook, the Fund may take overweight and underweight positions in various industries and may reallocate across the higher and lower-quality segments of the high yield market.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent High Yield Fund seeks high current income, and secondarily growth of capital.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg US Corporate High Yield Bond Index measures the performance of fixed-rate non-investment grade bonds.

Fund Management & Experience

Paul Ocenasek, CFA—Industry: 1987, Fund: 1997; Paul Tommerdahl, CFA—Industry: 2008, Fund: 2023

Risks: High yield securities are subject to increased credit risk as well as liquidity risk. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. Convertible securities are subject to additional risks and may also be forced to convert at an inopportune time which may decrease returns. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Leveraged loans also known as bank loans are subject to numerous risks. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund's value is influenced by the performance of the broader market. When interest rates fall, certain obligations are paid off more quickly and proceeds may have to be invested in securities with lower yields. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.

Thrivent Income Fund

Inception Date
Jun. 01, 1972

Ticker
LUBIX

Total Fund Assets
\$1.22 billion

Expense Ratio
Gross: 0.76%

Fund Description

This Fund invests primarily in investment-grade corporate bonds, government bonds, asset-backed securities, and mortgage-backed securities. The Fund may also invest a portion of its assets in high yield bonds, and preferred stock, and may opportunistically invest in foreign issuers (including emerging market issuers), non-agency mortgage-backed securities and commercial mortgage-backed securities. The Fund typically has its largest allocation in BBB-rated bonds, which are the lowest-tier of investment grade bonds. The Fund uses derivatives in order to manage the Fund's duration, or interest rate risk.

Investment Strategy/Process

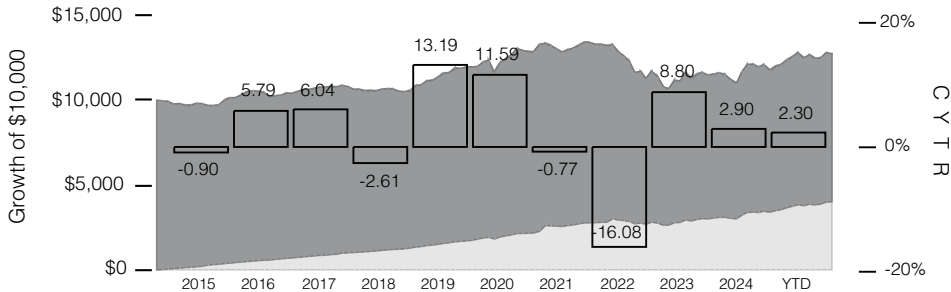

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental and other investment research techniques to determine which securities to buy and sell. The Adviser may purchase bonds of any maturity and generally focuses on U.S. companies that it believes are financially sound and have strong cash flows and earnings. The team also considers the macro-economic environment and performs an ongoing assessment of relative value and risk. Based on this market outlook, the Fund may take overweight and underweight positions in various sectors and industries and may reallocate across the higher and lower-quality segments of the bond market. The analysts perform research and provide buy/sell recommendations while the portfolio manager is responsible for portfolio construction and risk management.

Fund Management & Experience

Kent White, CFA—Industry: 1999, Fund: 2017; Cortney Swensen, CFA—Industry: 2005, Fund: 2023

Risks: Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. High yield securities are subject to increased credit risk as well as liquidity risk. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. To the extent that the financials sector continues to represent a significant portion of the Fund, The Fund will be sensitive to changes in, and its performance may depend to a greater extent on, factors impacting this sector. U.S. government securities may not be fully guaranteed by the U.S. government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund's value may be affected by factors specific to an issuer within the Fund. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund's value is influenced by the performance of the broader market. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.

Total Fund Assets

\$3.10 billion

Expense Ratio

Gross: 0.38%
Net: 0.33%*

Fund Description

This Fund is managed as a government money market fund according to rules established by the Securities and Exchange Commission (SEC) that are designed so that the Fund may maintain a stable, \$1.00 share price. Those rules generally require the Fund to invest only in high quality securities that are denominated in U.S. dollars and have short remaining maturities. The Fund is also required to maintain a dollar-weighted average maturity of not more than 60 days and a dollar-weighted average life of not more than 120 days.

Investment Strategy/Process

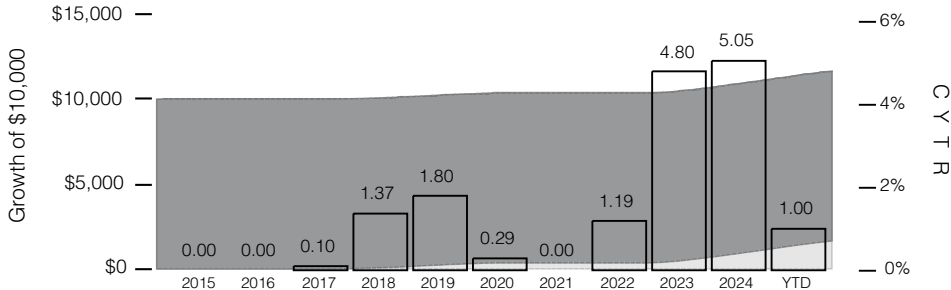

The portfolio management team seeks to produce current income while maintaining liquidity by investing at least 99.5% of its total assets in U.S. government securities, cash and repurchase agreements collateralized fully by government securities or cash. The Adviser invests in securities by selecting from the available supply of short-term government securities based on its interest rate outlook. Although the Fund frequently holds securities until maturity, the Adviser may sell securities to increase liquidity.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees associated with the Fund. However, this may be terminated before the indicated termination date upon the mutual agreement between the Trustees of the Fund and the Adviser. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

Investment Objective

Thrivent Money Market Fund seeks a high level of current income, while maintaining liquidity and a constant net asset value of \$1.00 per share.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

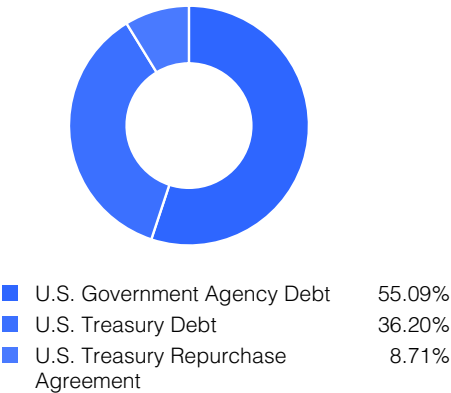

Fund Management & Experience

William Stouten—Industry: 1993, Fund: 2003

Thrivent Money Market Fund: You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.

Risks: The Fund invests at least 99.5% of its assets in U.S. government securities, cash and repurchase agreements collateralized fully by government securities or cash. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so and you could lose money. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund sponsor has no legal obligation to provide financial support to the Fund and you should not expect that the sponsor will provide financial support to the Fund at any time. U.S. government securities may not be fully guaranteed by the U.S. government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund's value is influenced by the performance of the broader market. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. If the seller of a repurchase agreement defaults, the Fund may incur losses. These and other risks are described in the prospectus.

Fund Description

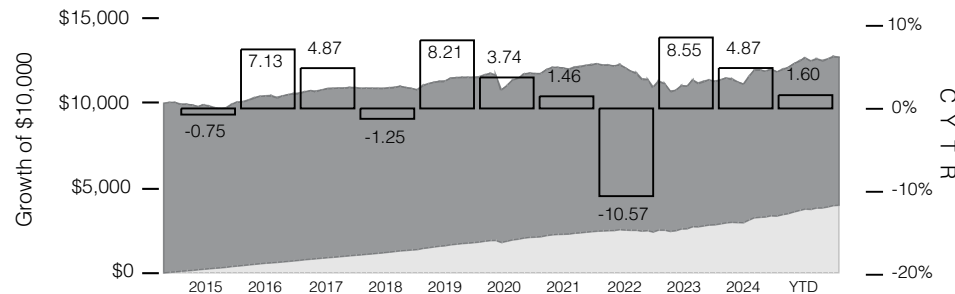

This Fund seeks to generate income by investing predominantly in a diversified mix of high-income fixed income securities. It invests primarily in higher-yielding, higher-risk, fixed income securities to generate income, while the equity holdings are generally opportunistic investments. Investments are diversified across sectors in order to manage risk and potentially provide more stability when interest rates rise. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments. Prior to 2/28/2025, the Fund was named Thrivent Opportunity Income Plus Fund.

Investment Strategy/Process

The Fund primarily invests in a broad range of debt securities. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sectors based on their views of the market and economy. Fixed income securities and equity holdings are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Multisector Bond Fund seeks a high level of current income, consistent with capital preservation.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg Mortgage-Backed Securities Index represents the performance of securities backed by pools of mortgages.

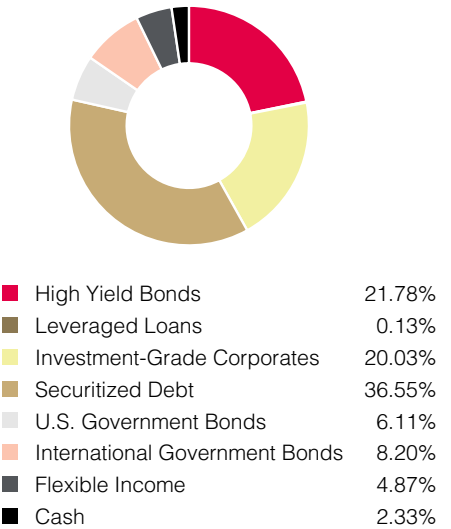

Bloomberg US High Yield Ba/B 2% Issuer Capped Index represents the performance of Ba or B-rated corporate bond market. Issuers are constrained to a maximum 2% weighting.

Fund Management & Experience

Jon-Paul (JP) Gagne—Industry: 2004, Fund: 2025;
 Stephen Lowe, CFA—Industry: 1996, Fund: 2018;
 Theron Whitehorn, CFA—Industry: 2002, Fund: 2021

Risks: Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. Sovereign debt and mortgage-related and other asset-backed securities are subject to additional risks. The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's issuers. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) involves additional risks. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The Fund may engage in active and frequent trading of portfolio securities, which may result in higher transaction costs and higher taxes. When interest rates fall, certain obligations are paid off more quickly and proceeds may have to be invested in lower-yielding securities with lower yields. These and other risks are described in the prospectus.

Thrivent Municipal Bond Fund

Inception Date

Dec. 03, 1976

Ticker

AAMBX

Total Fund Assets

\$1.17 billion

Expense Ratio

Gross: 0.76%

Fund Description

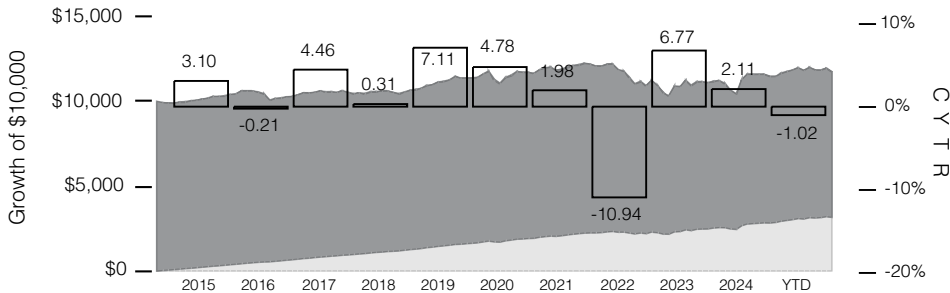

This Fund invests in a nationally diversified portfolio of predominantly investment grade municipal bonds. A municipal bond is a debt security issued by a city, county or state government to finance its capital expenditures. These bonds often finance public projects such as schools, roads, bridges, sewers or hospitals. Municipal bonds are generally exempt from federal income taxes. The Fund generally holds investment-grade bonds and unrated bonds that the Adviser determines to be of comparable quality. The Fund may invest in lower quality bonds that may have a higher yield but more credit risk and longer duration than investment-grade bonds. It invests in both general obligation bonds that are backed by the taxing authority of the issuer, and revenue bonds that are repaid from the revenues generated by the project. Municipal bonds typically have a longer duration and more interest-rate risk than other corporate bonds.

Investment Strategy/Process

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental and other investment research techniques to determine which securities to buy and sell. Through rigorous credit research, the analysts seek to identify high-quality municipal bonds that are issued by financially-sound entities with strong fundamentals and adequate cash flows to meet their principal and interest obligations. The team may also invest in Treasury futures contracts to manage duration, or interest rate risk. The portfolio manager is responsible for portfolio construction and risk management and seeks to invest with a very prudent level of risk. The Fund's holdings are well-diversified both geographically and across sectors.

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

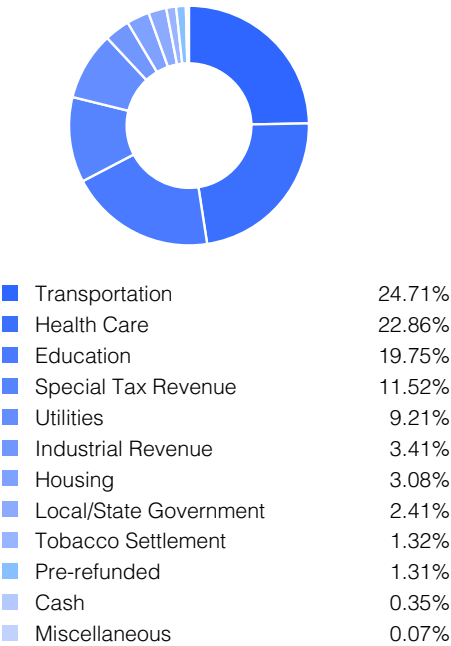

Bloomberg Municipal Bond Index is a market value-weighted index of investment grade municipal bonds with maturities of one year or more.

Fund Management & Experience

Johan Åkesson, CFA—Industry: 1993, Fund: 2022; Stephanie Woeppel—Industry: 2004, Fund: 2023

Risks: Municipal bonds may be affected by political or economic conditions at the state, regional or federal level. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. Changes in federal income tax laws or rates may affect both the net asset value of the Fund and the taxable equivalent interest generated from securities in the Fund. Some issues may be subject to state and local taxes and/or the federal and state alternative minimum tax. The use of futures contracts involves additional risks such as a loss in value in the underlying instrument, which could decrease the Fund's value. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund's value is influenced by the performance of the broader market. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.

Thrivent Short-Term Bond Fund

Inception Date

Oct. 29, 1999

Ticker

LBLAX

Total Fund Assets

\$1.27 billion

Expense Ratio

Gross: 0.59%

Fund Description

This Fund invests primarily in investment-grade corporate bonds, U.S. government bonds, asset-backed securities, mortgage-backed securities and collateralized debt obligations. The Fund may also invest a portion of assets in foreign securities. The dollar-weighted average effective maturity for the Fund is expected to be between one and five years. The Fund's shorter duration makes it less sensitive to interest rate changes than some longer-duration funds. As a result, the Fund may be appropriate for an investor who is seeking the opportunity to generate a modest level of income (with some investment risk), but with less interest rate risk and a lower return potential than most longer maturity bond funds. Prior to 2/28/2025, the Fund was named Thrivent Limited Maturity Bond Fund.

Investment Strategy/Process

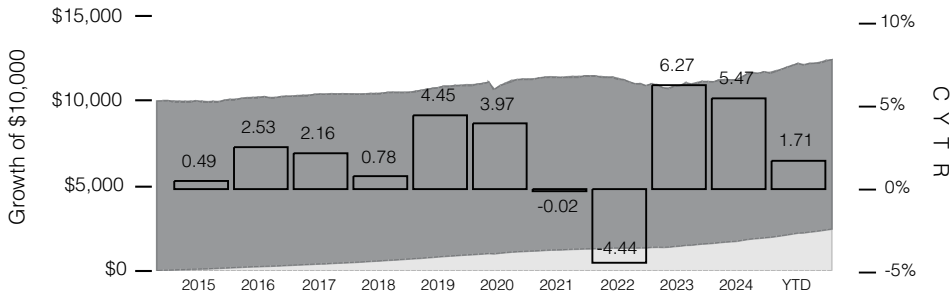

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental and other investment research techniques to determine which debt securities to buy and sell. The Adviser generally focuses on issuers that it believes are financially sound and that have strong cash flows and earnings. The Fund may use an interest-rate management technique that includes the purchase and sale of U.S. Treasury securities and related futures contracts for the purpose of managing the duration of the Fund.

Investment Objective

Thrivent Short-Term Bond Fund seeks a high level of current income consistent with stability of principal.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

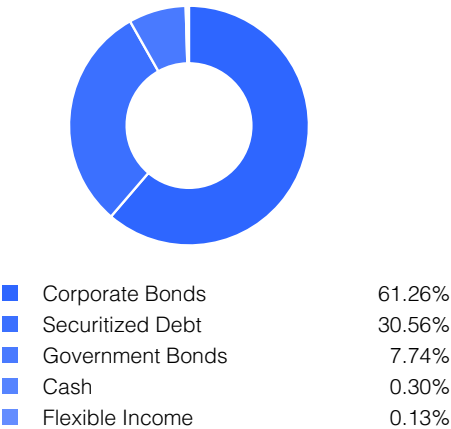

Bloomberg Government/Credit 1-3 Year Bond Index measures the performance of U.S. government bonds with maturities of 1-3 years.

Fund Management & Experience

Cortney Swensen, CFA—Industry: 2005, Fund: 2020; Jon-Paul (JP) Gagne—Industry: 2004, Fund: 2021

Risks: U.S. government securities may not be fully guaranteed by the U.S government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. In addition to typical risks associated with fixed income and asset-backed securities, collateralized debt obligations are subject to additional risks. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The use of futures contracts involves additional risks such as a loss in value in the underlying instrument, which could decrease the Fund's value. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund's value is influenced by the performance of the broader market and by factors specific to an issuer within the Fund. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.
