Risks: The Fund primarily invests in securities of large companies, which may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The value of the Fund is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Fund may incur losses due to incorrect assessments of investments by its investment adviser. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards. The use of derivatives (such as futures and swaps) involves additional risk and transaction costs, which could leave the Fund in a worse position than if it had not used these instruments.

Fund Description

The Thrivent Large Cap Stock Fund seeks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in a globally-diversified portfolio that includes a combination of both large-cap “growth” stocks and “value” stocks. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock’s price to the company’s earnings and growth trends. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified, global portfolio. The team uses fundamental, quantitative and technical investment research techniques to seek to identify and purchase companies that appear to have strong, long-term growth prospects and that are financially sound and led by capable management teams.
