**Inception Date**    **Total Fund Assets**    **Ticker**  
2/28/2017            \$8.7 million            TLVOX

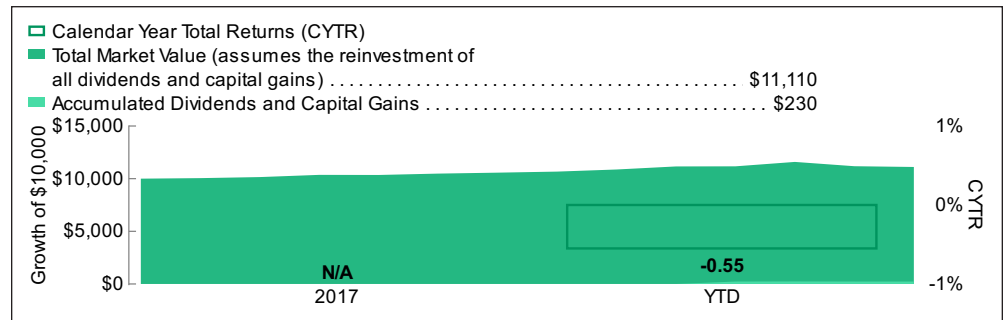

**Fund Description**

fund seeks to provide investors with returns similar to the global equity markets with lower volatility over a full market cycle. The Fund is globally diversified with an approximate allocation of 60% U.S. and 40% non-U.S. stocks and may invest in securities of any market capitalization. The Fund employs investment management techniques to identify securities that exhibit low volatility returns. Therefore it is expected that the Fund will generally underperform the global equity markets during periods of strong market performance.

**Investment Strategy/Process**

The portfolio management team uses active quantitative management techniques to forecast investment returns and to identify relationships between securities. The process uses factor models and also strives to identify groups of stocks that are less correlated to each other. The team constructs a risk-optimized portfolio with a focus on low-volatility securities in an attempt to achieve superior risk-adjusted returns. The portfolio is expected to be well-diversified with about 300 global securities. As a part of the risk management process, sector, country, and individual security weights will be constrained.

**Brian W. Bomgren, CQF**  
Fund Start: 2018; Industry Start: 2006

**Investment Objective**

Thrivent Low Volatility Equity Fund seeks long-term capital appreciation with lower volatility relative to the global equity markets.

**Who Should Consider Investing?**

The Fund may be suitable for investors who:

- Seek long-term growth with less volatility.
- Have a long-term investment time horizon and a moderate risk tolerance.
- Are comfortable with experiencing underperformance during certain parts of the market cycle in exchange for potentially lower volatility over a full market cycle.

**Minimum Investment**

Initial (non-retirement): \$2,000  
Initial (IRA or tax-deferred): \$1,000  
Subsequent: \$50

**Expense Ratio**

Gross: 3.74%  
Net: 1.20%

The Adviser has contractually agreed through at least Feb. 28, 2019 to reimburse certain expenses associated with the Fund. Refer to the expense table in the Fund's prospectus.

**Benchmark(s)**

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

- **Morgan Stanley Capital International (MSCI) World Minimum Volatility Index - USD Net Returns** measures the performance characteristics of a minimum variance strategy applied to a universe of large- and mid-cap stocks in 23 developed market countries. It is an optimized version of the MSCI World Index.

**Fund Management & Experience**

Fund Start: 2017; Industry Start: 2008

**Brian W. Bomgren, CQF**  
Fund Start: 2018; Industry Start: 2006

*Risks: The Fund primarily invests in equity securities. Although the Fund seeks lower volatility than the global equity markets, its returns will experience some volatility. The value of the Fund is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Fund may incur losses due to investments that do not perform as anticipated by the investment adviser. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards. Small and medium-sized companies often have greater price volatility and less liquidity than larger companies. Large companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The use of derivatives (such as futures and swaps) involves additional risks and transaction costs, which could leave the Fund in a worse position than if it had not used these instruments.*

**All data represents past performance and assumes the reinvestment of dividends and capital gains. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Visit ThriventFunds.com or call 800-847-4836 for performance results current to the most recent month-end.**
