

# Thrivent Mid Cap Value Fund

**Inception Date** Feb. 28, 2020    **Ticker** TMCVX    **Total Fund Assets** \$39.13 million    **Expense Ratio** Gross: 2.04%    Net: 0.90%\*

## Fund Description

This fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in mid-sized companies across the value spectrum. Value stocks are companies that trade at a lower price compared to the market, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Mid-sized companies may be more established than small companies but have the opportunity to experience faster growth as they seek to become large-cap companies. However, they typically have greater risk than larger, more-seasoned companies.

## Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management. The Fund invests in a diversified portfolio of value stocks with improving or positive outlooks relative to market expectations. The process begins with idea generation and screening to identify stocks that have certain characteristics. The team uses fundamental, quantitative and technical investment research techniques to seek to identify and purchase mid-sized companies that are in industries with good economic outlooks and that have strong prospects for growth in their sales and earnings. They also seek to identify companies with high-quality management teams and strong financial positions, and monitor risk in an effort to build a well-diversified portfolio.

## Growth of \$10,000 and Calendar Year Performance (%)

□ Calendar Year Total Returns (CYTR) - without charges, fees, or expenses  
■ Total Market Value (reflects reinvestment of all dividends and capital gains) - \$18,030  
□ Current Value of Reinvested Dividends and Capital Gains - \$1,500

## Average Annualized Returns (%) Periods less than one year are not annualized

**Risks:** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The Fund's value is influenced by a number of factors, including the performance of the broader market, and risks specific to the Fund's asset classes, investment styles, and issuers. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. These and other risks are described in the prospectus.
