Risks: The Fund invests in debt securities and equity securities. The value of the Fund is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Fund may incur losses due to incorrect assessments of investments by its investment adviser. Bond prices generally fall as interest rates rise. Credit risk is the risk that an issuer of a debt security may not pay its debt, and high yield securities are subject to increased credit risk as well as liquidity risk. Leveraged loans, REITs, preferred securities, convertible securities, sovereign debt, and mortgage-related and other asset-backed securities are subject to additional risks. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards; these risks are magnified for investments in emerging markets. An ETF is subject to additional fees and expenses, tracking error, and the risks of the underlying investments that it holds. The use of derivatives (such as futures and swaps) involves additional risks and transaction costs, which could leave the Fund in a worse position than if it had not used these instruments. The Fund may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies.

Fund Description

The Thrivent Diversified Income Plus Fund seeks to provide a steady and dependable income stream along with modest capital appreciation. The Fund has a long-term target allocation of 70% fixed income and 30% equity securities. It invests in higher-yielding, higher-risk, fixed-income securities to generate income, and in equities to provide potential growth and income. Investments are diversified across sectors in order to manage risk and potentially provide more stability when interest rates rise.

Investment Strategy/Process

The portfolio management team actively manages the Fund with overweight and underweight positions in the various sectors based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.
