**Inception Date** 12/29/1997    **Total Fund Assets** \$515.6 million    **Ticker** IINX

**Fund Description**

The Thrivent Opportunity Income Plus Fund generates income by investing predominantly in a diversified mix of high-yielding fixed income securities. The Fund has a long-term target allocation of 95% fixed income and 5% equity securities. It invests primarily in higher-yielding, higher-risk, fixed-income securities to generate income, while the equity holdings are generally opportunistic investments. Investments are diversified across sectors in order to manage risk and potentially provide more stability when interest rates rise.

**Investment Strategy/Process**

The portfolio management team actively manages the Fund with overweight and underweight positions in the various sectors based on their views of the market and economy. Fixed income securities and equity holdings are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges. Prior to August 16, 2013, the Fund was named Thrivent Core Bond Fund. It invested primarily in investment-grade corporate bonds, government bonds, asset-backed securities, and mortgage-backed securities. On August 16, 2013, the Fund adopted its current name and investment strategy, which includes the ability to invest in a diversified mix of higher-yielding fixed-income securities.

**Growth of \$10,000 and Calendar Year Performance (%)**

**Investment Objective**

Thrivent Opportunity Income Plus Fund seeks a high level of current income, consistent with capital preservation.

**Who Should Consider Investing?**

The Fund may be suitable for investors who:

- Seek a high level of income and are able to withstand the volatility of high yielding bonds in pursuit of high current income.
- Have a medium to long-term time horizon and a moderately conservative risk tolerance.

**Minimum Investment**

Initial (non-retirement): \$2,000  
Initial (IRA or tax-deferred): \$1,000

*Risks: The Fund primarily invests in a broad range of debt securities. The value of the Fund is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Fund may incur losses due to incorrect assessments of investments by its investment adviser. Bond prices generally fall as interest rates rise. Credit risk is the risk that an issuer of a debt security may not pay its debt, and high yield securities are subject to increased credit risk as well as liquidity risk. Leveraged loans, REITs, preferred securities, convertible securities, sovereign debt, and mortgage related and other asset-backed securities are subject to additional risks. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards; these risks are magnified for investments in emerging markets. An ETF is subject to additional fees and expenses, tracking error, and the risks of the underlying investments that it holds. The use of derivatives (such as futures and swaps) involves additional risks and transaction costs, which could leave the Fund in a worse position than if it had not used these instruments. The Fund may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies.*
