

# THRIVENT MODERATELY AGGRESSIVE ALLOCATION FUND

TMAFX | CLASS S | JUNE 30, 2017

**Thrivent Moderately Aggressive Allocation Fund** is oriented towards growth and is diversified across a variety of asset classes with a target allocation of 77% equities and 23% fixed income.

## Fund Key Points

### Strategic allocation

Each asset allocation fund starts with a strategic allocation among the various asset classes calibrated for each risk preference (moderately conservative, moderate, moderately aggressive and aggressive). The methodology takes into account the historical relative performance and correlations among the asset classes to find a combination for each risk preference on the efficient frontier. This is depicted in the graphic below.

### Tactical overlay

The most senior Thrivent Asset Management investment professionals meet weekly to assess potential changes to the asset allocation based on current and expected market conditions. They take into account macro-economic factors such as employment data, inflation rates, changes to government regulations, and other data that may help bridge the gap between historical data and current realities.

### Selecting securities

The management team invests in Thrivent Mutual Funds, but also purchases individual securities in asset classes and sectors that may not be represented by another Thrivent Mutual Fund. This provides additional diversification and more flexibility to invest across a wide variety of investments. The managers also use derivatives (without leverage) to implement tactical changes and efficiently allocate incoming cash flows.

## Target Allocation

## Fund Composition AS OF JUNE 30, 2017

Portfolio is invested in:

**Thrivent Mutual Funds**

**41%**

**Direct Investments**

Stocks, Bonds, ETFs, Derivatives, Cash

**59%**

**Risks:** The Fund invests in other Thrivent Mutual Funds and in directly-held equity and debt instruments. The Fund is subject to its own fees and expenses and the expenses of the other funds in which it invests, and is subject to all of the risks of the other funds in which it invests. The value of the Fund is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Fund may incur losses due to incorrect assessments of investments by its investment adviser. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards. Bond prices generally fall as interest rates rise. Credit risk is the risk that an issuer of a debt security may not pay its debt, and high yield securities are subject to increased credit risk as well as liquidity risk. The use of derivatives (such as futures and swaps) involves additional risks and transaction costs, which could leave the Fund in a worse position than if it had not used these instruments. The Fund may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies.

<sup>7</sup>Fee Waiver: The Advisor has contractually agreed, for as long as the proposed fee structure is in place, to waive an amount equal to any investment advisory fees indirectly incurred by the Fund as a result of its investment in any other mutual fund for which the Advisor serves as investment advisor. This contractual provision may be terminated upon the mutual agreement between the Independent Trustees of the Fund and the Advisor. If this waiver had not been in effect, performance would have been lower.
